SKILLS

- / Fundamentals of Computer Science (e.g. algorithms, data structures, OOP).
- / Basic understanding of networking(TCP/IP) and data communications.
- / Basic knowledge on Linux and Windows Server.
- / Proficient with HTML/CSS,Java,C,PHP,MySQL.
- / Basic knowledge of Python,Vue.js.
- / Working experience of PHP,JQuery,Laravel.

EXPERIENCE

- / During exchange student in Taiwan, I participated in the Bahamut ACG Creative Competition and used Cocos2d alone to create a Chinese idiom game. This game makes it no longer boring for teenagers to learn idioms.
- / I did some part-time jobs during my school years. I used Python and BeautifulSoup to climb the contact information and research direction data of some professors in Shanghai's universities.
- / During her junior year, I started a business with my classmates and set up a company. I worked as a backend developer. We create a APP, use this app, students can share their spare time and energy to help each other. I was also traveling to the IRS and the local taxation bureau to learn about some of the processes that the company had to go through.

AWARDS & CERTIFICATES

- / School-level scholarship
- / National Computer Rank Examination (Level 2 C++)
- / College English Test Band 4
- / Microsoft Technology Associate: Software Development Fundamentals
